

# Bike fitting guide

(with this guide you can make sure your bike fits in the Bikeself)

1. Print the next page on your printer (check that "do not scale" -option is clicked).
2. Fold the page from the point of dashed line so that all you can see is the colored areas.
3. Keep your bike on upright position and put the folded page behind your frame.
4. Make sure that all the criterias marked on the colored areas are fulfilled. (Please notice that an A4 page is only 297mm wide and the Bikeself is 300mm wide so leave few millimetres free space on both sides!)
5. If all the criterias are fulfilled Your bike fits in the Bikeself. Congrats!

**Fold from here**

300mm

Make sure the gray area fits on top of your top-tube.

Make sure your top-tube fits in the green area.

53mm

Make sure the brown area fits under your top-tube.

41mm
